PROJECTS

Split Spend – Personal Expense Tracking Application | [GitHub](#) | [Live](#) Dec 2025 – Present

- Built a practical personal expense-management application to **record, organize, search, and review** day-to-day spending through a simple web interface.
- Implemented expense history with **monthly totals, category totals, search, deletion, and highest-expense tracking** to help users review spending patterns.
- Designed straightforward user-side data handling and responsive web interaction, resulting in a **usable portfolio-ready expense tracker**.

Tech Stack: HTML, CSS, JavaScript

EduTrack – Personal Academic Manager | [GitHub](#) | [Live](#) Aug 2026 – Present

- Developed a student-focused academic management application for **organizing academic information and everyday study utilities** in one place.
- Structured the application around **subjects, marks, grades, credits, notes, and attendance** to support common academic tracking needs.
- Built a data-focused workflow using **Flask and SQLite**, keeping student records organized and easy to update.

Tech Stack: Flask, SQLite
